

GREASE STAYS WHERE IT BELONGS.

ALASKA®
BARRIER GREASE

Grammage range (g/m²)

ALASKA[®]
BARRIER GREASE
is a hard sized virgin
fibre cartonboard
with the most
innovative and best
in class barrier
against grease!

Level: I > 120h
according to DIN 53116

Superior grease resistance and moisture protection guarantees high packaging stability even at low temperatures

Provides protection against grease spots and discoloration on the packaging

Light-weighted, easily recyclable and repulpable with paper and board recovery stream

More sustainable alternative to PE coating, ensures cost effectiveness vs PE coating

Ideally suited for chilled, frozen and dry food as well as food service

Certified for direct contact with dry, moist and greasy food

Produced with water-based dispersion barrier without any fluorinated polymers

Complements the proven ALASKA® portfolio with excellent printability and best finishing characteristics

Available with recognized certifications for sustainable forest management

MOST MODERN MACHINE
